Oxy-PEEP® High Flow Oxygen with PEEP

Oxy-PEEP® is a High Flow PEEP oxygen system that is easy to use, easy to carry, and is there when you need it most. This unique system allows for variable flows, O₂ concentrations, and PEEP, all in a pre-packaged and pre-assembled system. Oxy-PEEP® was engineered with emergency care givers in mind. Its intuitive design allows for quick set up and immediate results, and can be left with the patient in transition to the ER.

Quick, Easy, Portable, and Lightweight

You’ll no longer need assorted PEEP valves, expensive tedious equipment, permanent manifolds, and multiple pieces to assemble when you administer high flow oxygen with PEEP.

- A single adjustable PEEP valve cmH₂O to achieve therapeutic goals
- Dilutor allows you to adjust FiO₂ from 32–95%, appropriate for most clinical conditions
- Air cushion mask is comfortable for most adult faces
- Reservoir bag provides additional oxygen-enriched gas during unexpected deep inspiration
- Inhalation safety valve provides inspiratory route in the event of gas failure

Minimal O₂ Consumption

No Flow Generator

- Disposable, single-patient system
- Need only an O₂ tank source and flowmeter
- No capital equipment to buy or repair
